

Goal 10: Reduce inequality within and among countries.

Target 10.1: By 2030, progressively achieve and sustain income growth of the bottom 40 per cent of the population at a rate higher than the national average

10.1.1 Growth rates of household expenditure or income per capita among the bottom 40 per cent of the population and the total population

Indicator Classification

Global SDG Indicator	Yes
Proxy	No
Supplemental	No

Definition

Global Definition

The growth rate in the welfare aggregate of bottom 40 percent is computed as the annualized average growth rate in per capita real consumption or income of the bottom 40 percent of the income distribution in a country for household surveys over a roughly 5-year period. The national average growth rate in the welfare aggregate is computed as the annualized average growth rate in per capita real consumption or income of the total population in a country from household surveys over 5-year period.

National Definition

The growth rate in the welfare aggregate of bottom 40 percent is computed as the annualized average growth rate in per capita real consumption or income of the bottom 40 percent of the income distribution in a country for household surveys over a roughly 5-year period. The national average growth rate in the welfare aggregate is computed as the annualized average growth rate in per capita real consumption or income of the total population in a country from household surveys over 5-year period.

Method of Computation

Global

Growth rates are calculated as annualized growth rates over a roughly 5-year period. This is computed using the compounded growth formula:

$$(((\text{mean } t_1)/(\text{mean } t_0))^{(1/n)}-1)*100$$

Where t_1 is the the final year of the growth period and t_0 is the initial year.

National

Growth rates are calculated as annualized growth rates over a roughly 5-year period. This is computed using the compounded growth formula:

$$(((\text{mean } t_1)/(\text{mean } t_0))^{(1/n)}-1)*100$$

Where t_1 is the the final year of the growth period and t_0 is the initial year.

Indicator Classification

Global SDG Indicator	Yes
Proxy	No
Supplemental	No

Definition

Global Definition

Labour share of Gross Domestic Product (GDP) is the total compensation of employees given as a percent of GDP, which is a measure of total output. It provides information about the relative share of output which is paid as compensation to employees as compared with the share paid to capital in the production process for a given reference period.

National Definition

This is the ratio of compensation received by employees over GDP.

Method of Computation

Global

Labor share of GDP = total compensation of employees / GDP * 100

National

Labor share of GDP = total compensation of employees / GDP * 100

Definition

Global Definition

FSIs are indicators of the current financial health and soundness of the financial institutions in a country, and of their corporate and household counterparts. They include both aggregated individual institution data and indicators that are representative of the markets in which the financial institutions operate. FSIs are calculated and disseminated for the purpose of supporting macroprudential analysis. This is the assessment and surveillance of the strengths and

National Definition

These are the sets of indicators the BSP is submitting to IMF which consist of 7 indicators

- a) CAMELS composite rating of at least “3” in the last regular examination;
- b) Minimum applicable capital adequacy ratio;
- c) Minimum reserves against deposit liabilities, deposit substitutes, and common trust;
- d) Liquidity floor for government deposits;
- e) FCDU/EFCDU foreign currency asset cover on FCDU/EFCDU foreign currency liabilities; and
- f) Maximum allowable open foreign exchange position.
- g) Real Price Index- Department of Economic Statistics

Remarks (Source of possible discrepancies with the global data)

The Supervision and Examination Sector is in charge of submitting the 6 indicators to IMF. Another indicator is submitted by the Department of Economic Statistics which is the real estate price index. The total FSI indicators submitted by BSP is 7.

Goal 10: Reduce inequality within and among countries.

Target 10.6: Ensure enhanced representation and voice for developing countries in decision-making in global international economic and financial institutions in order to deliver more effective, credible, accountable and legitimate institutions

10.6.1 Proportion of members and voting rights of developing countries in international organizations

Contact Information

Agency:

Tel. Number:

Contact Person:

Email Address: s.deguzman@psa.gov.ph

Indicator Classification

Global SDG Indicator	Yes
Proxy	No
Supplemental	No

Definition

Global Definition

The indicator Proportion of members and voting rights of developing countries in international organizations has two components, the developing country proportion of voting rights and the developing country proportion of membership in international organisations. In some institutions these two components are identical.

The indicator is calculated independently for eleven different international institutions: The United Nations General Assembly, the United Nations Security Council, the United Nations Economic and Social Council, the International Monetary Fund, the International Bank for Reconstruction and Development, the International Finance Corporation, the African Development Bank, the Asian Development Bank, the Inter-American Development Bank, the World Trade Organisation, and the Financial Stability Board.

National Definition

The indicator Proportion of members and voting rights of developing countries in international organizations has two components, the developing country proportion of voting rights and the developing country proportion of membership in international organisations. In some institutions these two components are identical.

The indicator is calculated independently for eleven different international institutions: The United Nations General Assembly, the United Nations Security Council, the United Nations Economic and Social Council, the International Monetary Fund, the International Bank for Reconstruction and Development, the International Finance Corporation, the African Development Bank, the Asian Development Bank, the Inter-American Development Bank, the World Trade Organisation, and the Financial Stability Board.

Method of Computation

Global

The computation uses each institutions' own published membership and voting rights data from their respective annual reports. The proportion of voting rights is computed as the number of voting rights allocated to developing countries, divided by the total number of voting rights. The proportion of membership is calculated by taking the number of developing country members, divided by the total number of members.

Data is calculated and presented separately for each international organization.

National

The indicator is answerable by Yes or No in the national context. Yes if the Philippines has the voting rights in the listed international organization.

The custodian agency will compile the global indicator.
