

Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all, and build effective, accountable and inclusive institutions at all levels

Target 16.1: Significantly reduce all forms of violence and related death rates everywhere

16.1.1 Number of victims of intentional homicide per 100,000 population by sex and by age

Indicator Classification

Global SDG Indicator	Yes
Proxy	No
Supplemental	No

Definition

Global Definition

The indicator is defined as the total count of victims of intentional homicide divided by the total population, expressed per 100,000 population.

Intentional homicide is defined as the unlawful death inflicted upon a person with the intent to cause death or serious injury. Among different types of killings, murder is included in the count of intentional homicide.

National Definition

Murder (Intentional homicide) is the act of taking one's life with attendant circumstances as described in Article 248 of the Revised Penal Code of the Philippines (i.e., with evident premeditation, treachery, by means of fire, poison, explosion or any other method involving great waste or ruin, with cruelty by deliberately and inhumanly augmenting the suffering of the victim, and in consideration of a price, reward, promise or other base motives).

Method of Computation

Global

The indicator is calculated as the total number of victims of intentional homicide recorded in a given year divided by the total resident population in the same year, multiplied by 100,000.

National

The total number of victims of murder (intentional homicide) reported in a given period of time divided by the total resident population in the same period of time, multiplied by 100,000.

References

Remarks (Source of possible discrepancies with the global data)

Homicide data are typically produced by two separate and independent sources, namely: (a) criminal justice; and (b) public health. The primary source on intentional homicide is usually an institution of the criminal justice system (police, prosecution, courts, or prisons). On the other hand, data on homicide produced by public health system are guided by the ICD-10 of WHO, which provides a definition of 'death by assault' that is very close to the definition of intentional homicide of the ICCS of UNODC. WHO collects data on intentional homicide in the framework of regular data collection on causes of death. In this context, data on deaths by assault are considered as intentional homicides.

Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all, and build effective, accountable and inclusive institutions at all levels

Target 16.1: Significantly reduce all forms of violence and related death rates everywhere

16.1.1s2 Monthly average index crime rate

Indicator Classification

Global SDG Indicator	No

Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all, and build effective, accountable and inclusive institutions at all levels

Target 16.10: Ensure public access to information, and protect fundamental freedoms, in accordance with national legislation and international agreements

16.10.2 Number of countries that adopt and implement constitutional, statutory and/or policy guarantees for public access to information

Indicator Classification

Global SDG Indicator	Yes
Proxy	No
Supplemental	No

Definition

Global Definition

Number of countries that adopt and implement constitutional, statutory and/or policy guarantees for public access to information

The focus of this indicator is thus on the status of adoption and implementation of constitutional, statutory and/or policy guarantees for public access to information.. The definition relates directly to “public access to information”, which is wider than, but is also very much based upon, the established fundamental freedoms of expression and association. Conversely, these freedoms also both impact on the environment for public access to information.

National Definition

same as the global

Method of Computation

Global

The method of computation is both quantitative and qualitative, with data generated from a global review of existing surveys (e.g. UNESCO's World Trends in Freedom of Expression & Media Development reports, etc.), administrative records, expert assessments (e.g. World Justice Open Government Index), etc. More specifically, the following key variables will be assessed:

1. Does a country have constitutional, statutory and/or policy guarantees for public access to information?
2. Do those constitutional, statutory and/or policy guarantees reflect known international agreements (e.g. the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, etc.)?
3. What implementation mechanisms are in place to ensure that such guarantees work optimally?

To address these questions, the following will serve as performance sub-indicators:

- National law or constitutional guarantee on the right to information
- Country has signed and ratified relevant treaty obligations, with no significant exemptions, and these are reflected, to the extent possible, in domestic FOI legislation
- Public is aware of and exercises right to access official information
- Public bodies release information both pro-actively and on demand
- Effective and efficient appeals mechanism via independent administrative body e.g. information commissioner or ombudsman
- Any restriction on grounds of protection of personal privacy is narrowly defined so as to exclude information in which there is no justifiable public interest.

The means of verification will include:

The means of verification will include:

- Any law or policy on right to information that accords with international standards
- Reports from credible agencies/experts about right to information guarantees and the extent to which they reflect international standards/agreements
- Policies of public bodies concerning release of information (which ensure readily, freely available public access to information, including online)
- Evidence of state commitment to open government e.g. publication and dissemination of laws, court decisions, parliamentary proceedings, spending programmes (vis-à-vis SDG undertakings)
- Statistical information about public requests for official information and their fulfilment or rejection
- Statistical information about appeals or complaints over information requests that have been refused

Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all, and build effective, accountable and inclusive institutions at all levels

Target 16.a: Strengthen relevant national institutions, including through international cooperation, for building capacity at all levels, in particular in developing countries, for preventing violence and combatting terrorism and crime

16.a.1 Existence of independent national human rights institutions in compliance with the Paris Principles

Indicator Classification

Global SDG Indicator	Yes
Proxy	No
Supplemental	No

Definition

Global Definition

This indicator Existence of independent national human rights institutions in compliance with the Paris Principles measures the compliance of existing national human rights institutions with the Principles relating to the Status of National Institutions (The Paris Principles), which were adopted by the General Assembly (resolution 48/134) based on the rules of procedure of the Global Alliance of National Human Rights Institutions (GANHRI, formerly the International Coordinating Committee of National Institutions for the Promotion and Protection of Human Rights or ICC).

National Definition

A National Human Rights Institution is an independent administrative body set up by a State to promote and protect human rights. NHRIs are State bodies with a constitutional and/or legislative mandate to protect and promote human rights. They are part of the State apparatus and are funded by the State.

Method of Computation

Global

In terms of method of computation, the indicator is computed as the accreditation classification, namely A, B or C of the NHRI.

National

The Indicator is answerable by Yes or No. Yes if the country has National Human Rights Institution
